## LOW SMOKE HALOGEN FREE CABLE DUCTS

Halogen Free wires and wiring ducts are already compulsory in many areas as they are safer for human health. Halogen Free Wiring Ducts are made of a special purpose LSHF and flame retardant PC/ABS blend containing No Bromide, No Chlorine and No Fluorine. They still offer high impact resistance and excellent characteristics used for higher temperature applications. These are in compliance with EN 45545-2 European Union Standards. LSHF material also has characteristics of self-extinguishing, UL94 flammability rating of V-0, and it is RoHS compliant.

- Excellent fire-safety characteristics
- Smooth, burr-free edges protect installers from injury and wires from damage.
- Ribs can be removed easily thanks to upper scorlines.
- Lower scorlines at base of sidewall allow cutting out and removing sections of sidewall with no sharp edges
- Duct covers hold securely even in a vertical position and under vibration.
- Products are 2 meter length

Flame-retardant, self-extinguishing according to UL94-V0
EN50085-2-3-approved
Colour: Light Grey: RAL 7035
Temperature range from -25 °C to +90 °C
